

MHM 60XXL SEMI-AUTOMATIC HORIZONTAL

This Horizontal Baling machine can produce bales sizes of (1200mm-1500mm x 1100mm x 1100mm (L x W x H) with weights up to 750kg and up to 3T per hour depending on the waste stream and method of loading as well as this, it makes light work of baling large volumes of waste materials with the minimum amount of effort. The controls have multi product selection capabilities for various products ensuring maximum bale weights

Produces 32 bales per shipping container achieving maximum weight capacity.

Automatic Start - Automatic Compacting Cycle - Manual Tying
The Twin Ram Market leading Portcullis end door has been designed to eliminate any pulling & snapping of bale wire on ejection.

Bale chamber wear plates as standard.
Machine could be set to work with 3 different programs which change baling capabilities for different products to ensure consistency of bale weights.

Ripping Teeth are fitted as Standard.

TECHNICAL SPECIFICATION

Baler Dimensions L x W x H	8400mm x 1800mm x 2400mm
Bale Dimensions L x W x H	1.200m - 1.500m x 1.100m x 1.100m
Bale Weight	up to 750kg
Bale Discharge	Full Eject
Bale Chamber End Door	Vertical Hydraulic
Wire/Tape Tying	5 Horizontal Wire Ties
Loading Aperture L x W	2000mm x 1100mm
Power Supply	32 Amp 3P & E, D-Rated Breaker
Motor Power	15kW
Compaction Force	60 Tonnes
