

MHM 70XXL SEMI-AUTOMATIC HORIZONTAL

The MHM Powerbale 70XXL Semi-Automatic Horizontal Baler produces bale sizes of 1500mm x 1100mm x 1100mm (L x W x H). It has been specifically designed to produce up to 850kg bales so that with less than 30 bales it fills a shipping container, typically competitor machines require 48 bales and seldom achieve optimum shipping weights of 25 tonne.

The MHM Powerbale 70XXL has wear plates fitted as standard offering unrivalled serviceability of the machine, with full bale eject as standard and a portcullis door with our anti-wire snap technology. Ripping teeth are also fitted as standard to this MHM Powerbale 70XXL Horizontal Baler making light work of baling a variety of waste materials. A variety of feed options are available, as standard the MHM Powerbale 70XXL Horizontal Baler comes with a 2m wide hopper with a large 1500mm x 1500mm market-leading feed opening for bulky materials, other options include; Conveyor feed, trunnion bin lifter or mechanical feed.

The controls have multi-product selection capabilities for various products ensuring maximum bale weights. Built by ourselves MHM (UK) LTD here in the UK you can be assured of incomparable service levels.
